Taxonomies and thesauri: a list of references and resources for public sector applications

This bibliography has been prepared for Taxonomies in the Public Sector (TiPS), a discussion group which supports the Cabinet Office's Metadata Working Group by encouraging information professionals in the public sector to meet and develop guidance on the implementation of taxonomies and metadata. While IPSV (Integrated Public Sector Vocabulary) and its predecessors GCL and LGCL are an important focus for compliance with e-government standards, public sector applications commonly use a complementary specialised vocabulary in tandem with IPSV. The bibliography gives background references across the field from development to exploitation and sharing the outputs. The highlighted references are considered especially useful. The references have been grouped as follows:

Compliance framework in the UK	1
Background on the IPSV, GCL, LGCL and e-GMS	2
Directories of vocabularies, software and links to other resources	3
Assorted definitions of different types of controlled vocabulary	3
Making the case	4
Thesaurus/taxonomy design and construction	5
Multilingual thesauri	6
Use of taxonomies, categorisation, general interest	7
Controlled vocabularies for the Internet/Intranets	8
Folksonomies	9
A few on classification	9
For records management	10
What are other countries doing?	11
Software for thesaurus management and related functions	11
Metadata	11
Interoperability, mapping and formats for data exchange	12
Topic Maps, RDF and namespaces	13

Compliance framework in the UK
